Dear Loved Ones at home

I received your kind and loving letter this morning one my way to work and glad to hear from you Sorry to hear your are not feeling well you go and have your teeth fixed as soon as you can Well I expect you will want to give me a licking, as I have sined up for that 2 ½ acres on highway, it is good soil and some oak trees on the side street

2) so it will be pretty good I think although it is pretty high just no they have not got any water piped on any of the orchard tracts yet and wont have for sometime yet. Just let contract for laying of pipe the other day and it wont be in till June or July) you have no idea the amount of work there is to be done here this summer I have slected a lot close to civic center it is covered with live oak trees although it is not the shape I would like but it

3) the best I could do
for ~~that~~ the money
but we can not keep
any ~~stock~~ on it
but if you dont like
it, will exchange for
something else
no I dont think I
want a bike as it
is to hilly to ride
and to dusty
I did not expect you
to go right away ~~and~~
get our pants I
thought anytime that
you went to town for
something else
I haven't got much money
now as I have not
been paid for all most
two weeks as my
boss doesn't pay

4) only every two weeks now, and I made another payment on our place here so it owes me pretty short but expect to get some Sat no I don't get any L. G. papers now, but Mr Frances is going to send and get the L. G. Times next week Do you ready think you can get ready to move up here by first of May Pet so I will half to hurry and get a place to live

5

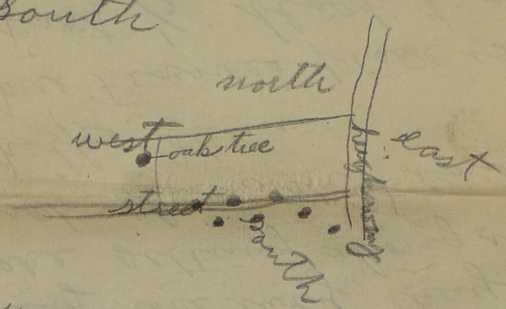
I wish I could see you all tonight I let Mr Mitchel read Helen last letter he thought it great for a girl of her age I surely feel proud of my girls the way they are getting along in school wish I could help them

Mrs Frances place is just ½ block from state highway, and about 5 or 6 blocks from civic center

6) We have no water only what the colony hauls in barrels, but expect to have water piped soon
I dont know what we are going to do about money to build with, they wont let you build unless you have got your lot paid for, so it looks pretty slim, but maybe can arange it some way
Dont send any seeds as I wouldnt have time to plant them and the rabbits are so bad here to they are

D) eating some of the fruit trees now, so would half to watch them all the time
There is no pasture near the 2½ acres as it is all planted to trees all around it but is some pasture ~~one~~ some residents lots where it has not been planted
Did you get last weeks natnal weekly if so the picture of house in center is one I helped build expect to start finishing in it in about ten days

8) Oh yes the 2½ acres is on a corner fronts on highway east and street on the south



Well it is 9.30 guess will go to bed am a little tired sorry you get so tired don't work so hard Good night with love to all from will write to Helen later Dadag
